

STAR GAZERS  
SG 1707M - 1M  
FEBRUARY 13-19, 2017

"VALENTINES DAY STAR!" (REPEAT OF 1505)

**JAMES:** WANT TO GIVE YOUR SWEETHEART THE BIGGEST VALENTINE EVER?

**DEAN:** THEN GO OUT WITH YOUR HONEY ON VALENTINE'S NIGHT FOR A HUGE RED VALENTINE'S STAR.

**JAMES:** LET'S SHOW YOU.

----(STOP & DROP)

**JAMES:** OUR SKIES ARE SET UP FOR AN HOUR AFTER SUNSET, AND IF YOU FACE SOUTH, YOU'LL SEE THE STAR BETELGEUSE. THE RED SHOULDER STAR OF ORION THE HUNTER.

**DEAN:** IF LOOK TOWARD THE SOUTHWEST, YOU'LL SEE THE RED PLANET MARS IN AN EXQUISITE PAIRING WITH THE PLANET OF LOVE, VENUS. VENUS IS THE REALLY BRIGHT ONE! PERFECT FOR VALENTINE'S DAY.

----(STOP - SKY BOARDS)

**DEAN:** BETELGEUSE SLOWLY PULSATES LIKE A GIANT HEART, AND IF WE COULD PLACE IT WHERE OUR SUN IS, ITS OUTER EDGE WOULD REACH PAST MARS; AND WHEN FULLY EXPANDED, ALL THE WAY OUT TO THE ORBIT OF JUPITER.

**JAMES:** SO THIS VALENTINE'S DAY, GIVE THE BIGGEST VALENTINE OF ALL, A GIANT RED STAR, PULSING LIKE A HEART FULL OF COSMIC LOVE.

**BOTH:** KEEP LOOKING UP!

---(STOP)
