

STAR GAZERS

SG 1807 – 1M

FEBRUARY 12-18, 2018

“Return of the Moon Joke Episode”

DEAN: It’s Moon-joke time!

JAMES: Why couldn’t the astronauts stay overnight on the Moon?

DEAN: Because it was full!

(STOP AND DROP)

DEAN: How do you know when the Moon’s going broke?

JAMES:

It’s down to its last quarter! On the night of February 22 you can see the right half of the Moon lit up. We call that first quarter since it has traveled one-quarter of the way around the Earth from its new moon phase.

DEAN:

On March 1st we’ll have a full Moon that will rise in the east as the Sun sets.

And on March 9, you’ll see the left half of the Moon illuminated.

The Moon is heading back to being New, so we call that last quarter and it’ll be near the planet Mars.

JAMES:

If you didn’t like our bad Moon jokes, we totally Apollo-gize. We tend to wax poetic. But be sure to

Moon-gaze with friends, family...

DEAN: And luna-tics this week.

BOTH: Keep looking up!
