

STAR GAZERS

SG 1832 - 1M

AUGUST 6-12, 2018

A RAINBOW OF  
PLANETS (NEW  
SHOW)

DEAN:

THE BEST WAY TO

GET INTO  
ASTRONOMY IS BY  
DISCOVERING  
PLAN-ETS.

JAMES:  
AND THIS MONTH  
IT IS SUPER-EASY  
TO FIND FOUR OF  
THEM:  
VENUS, JUPITER,

**SATURN, AND  
MARS.**

**(STOP DROP)**

**DEAN:  
WE'RE FACING  
WEST  
AT 9:30PM.  
THE BRIGHTEST  
PLANET FROM**

EARTH IS VENUS,  
AND YOU CANT  
MISS IT.

JAMES:  
THEN AS WE TURN  
A BIT TOWARD  
THE SOUTHWEST  
AT 10PM WELL  
FIND PLANET #2.  
AND ITS A BIGGIE!

THAT IS JUPITER!

DEAN:

NOW FACE

SOUTH.

THAT

UNASSUMING,

YELLOW-LOOKING

STAR

IS AC-TUALLY THE

PLANET SATURN.

JAMES:  
AND OUR LAST  
STOP ON OUR  
RAINBOW OF  
PLANETS TAKES  
US TO BRIGHT,  
REDDISH MARS  
IN THE SOUTH-  
SOUTHEAST.

**(STOP) CLOSE-UP  
ENDING**

**JAMES:  
SO FROM RIGHT  
TO LEFT LOOK  
FOR:  
VENUS, JUPITER,  
SATURN, AND  
MARS. FINDING  
THE PLANETS FOR**

YOURSELF IS FUN.  
BUT IT'S EVEN  
BETTER  
IF YOU SHARE  
THAT  
KNOWLEDGE WITH  
FRIENDS AND  
FAMILY.

DEAN:  
TAKE IT FROM US,

WHEN YOU SHOW  
SOMEONE  
A PLANET THEY  
WILL  
THINK IT,  
AND YOU ARE  
REALLY COOL.  
AND COOLNESS  
AWAITS WHEN  
YOU...

**BOTH:  
KEEP LOOKING  
UP!**
